Rajan kumar pandit

STUDENT

I am a motivated and enthusiastic beginner in the field of technology, currently pursuing knowledge in Operating Systems, Advanced Programming, and C programming. I am passionate about learning new concepts and developing projects, particularly in health tech. I am familiar with programming languages such as C and Python and have experience building basic applications using Flask. I am currently working on projects related to medicine and health technology, including a medication reminder system, and I aim to expand my skills by developing advanced features in my applications.

Work Experience

SELF (Self-Employed)

Project Maker & Developer – Self-Learning (Current)

- Developing health-related projects using Flask, Python, and HTML with a focus on building applications like medication reminder systems.
- Implemented APIs to fetch and display detailed information on medicines.
- Gained experience in project organization, coding best practices, and software tools.

Frontend & Backend Developer – Self-Learning (Current)

- Building and designing user interfaces using HTML and other frontend technologies.
- Writing backend code using Python and Flask, handling server-side logic, and managing databases.
- Experience working on both frontend and backend aspects of web applications to create full-stack solutions.

AI-Powered Learning Assistant – OpenAI

- Assists in learning programming, explaining technical concepts, and providing project guidance across various fields including Python, Flask, C programming, and HTML.
